

The New Clinical Patient Management System (CPMS)

The Clinical Patient Management System (CPMS) is a **secure, GDPR-compliant web-based platform** specifically designed to support **European Reference Networks (ERNs)** in the diagnosis and treatment of **rare or low-prevalence complex** diseases across national borders.

IT platform supporting medical collaboration and discussions

Clinical care functions
Desktop + Mobile

Secure and GDPR compliant

Architecture

Modular
Open source

Flexibility

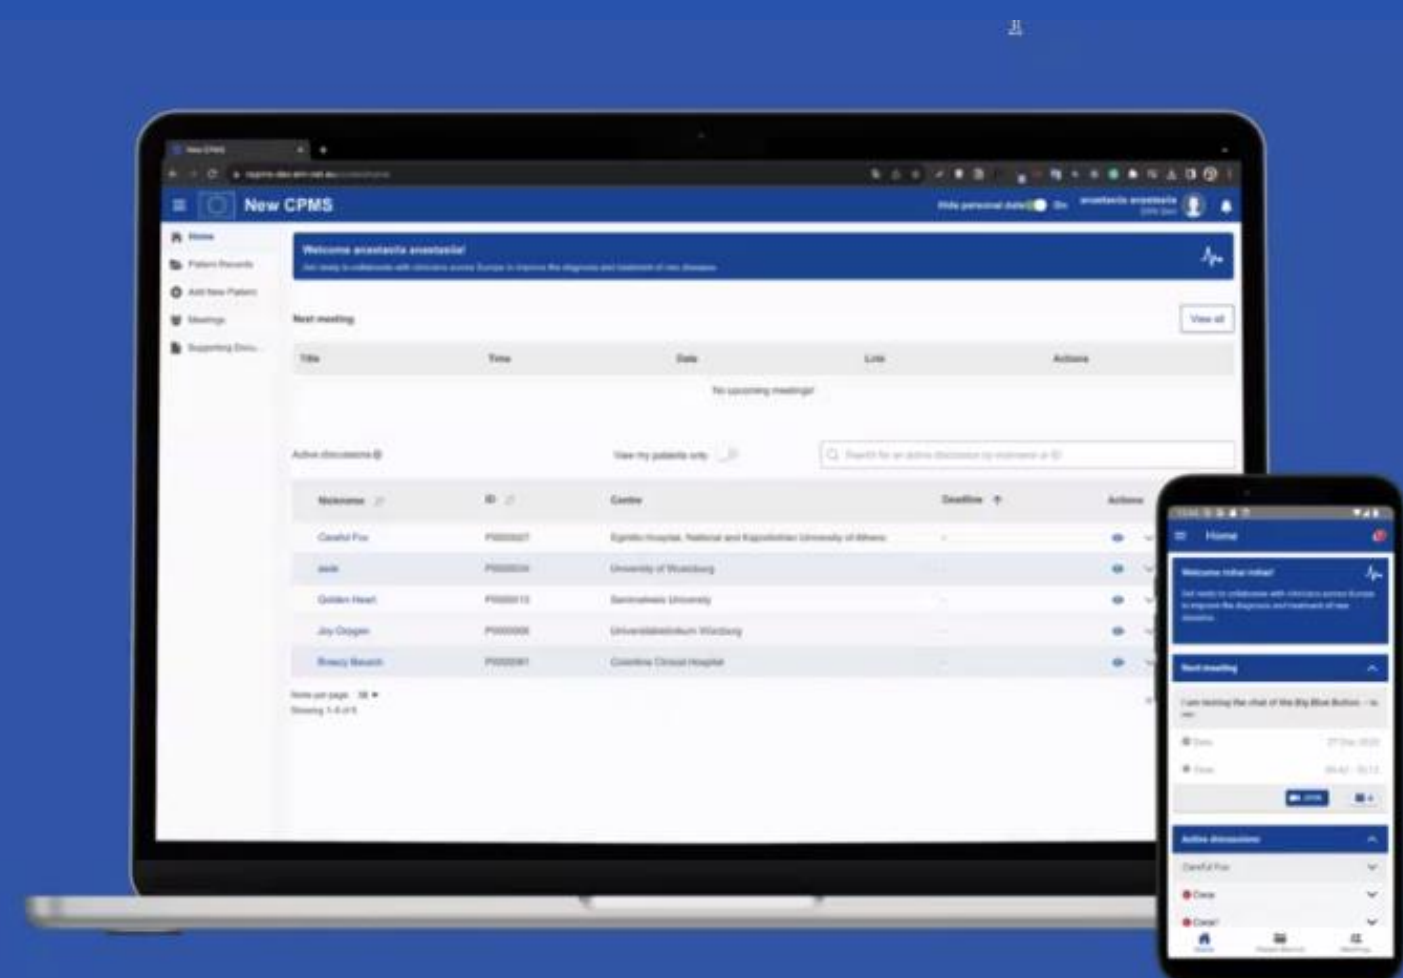

Configuration, and monitoring functions for the ERNs, Hospitals, Member States and Commission

Intuitive and easy to use!

Available for both registered hospitals in the ERNs and regional hospitals.

Want to test the new CPMS system?

Testing is recommended in Google Chrome
SMS verification of the EU Login.
