

The ERN ReCONNET online training course on rare and complex CTDs

**10 modules, each dedicated to a rare
connective tissue disease, with expert
insights and patient perspectives.**

1 Antiphospholipid Syndrome

Patient experience, pathophysiology, how to test, how to manage, CAPS, hot topics (childhood-onset APS, how to navigate the ACR/EULAR 2023 APS classification)

2 Ehlers-Danlos Syndromes

Patient experience, clinical presentation and differential diagnosis of non-vascular EDS, molecular confirmation, principles of treatment, including physical medicine, rehabilitation and drug use

3 IgG4-Related Diseases

Patient experience, pathophysiology, clinical aspects, red flags and diagnosis

4 Idiopathic Inflammatory Myopathies

Patient experience, ILD, heart involvement in myositis, dysphagia and exercise in myositis

5 Mixed Connective Tissue Diseases

Patient experience, pathophysiology, epidemiology, clinical aspects and red flags, diagnosis, prognosis, how to treat, evolving views, monitoring

6 Relapsing Polychondritis

Patient experience, pathophysiology, epidemiology, clinical aspects and red flags, diagnosis, treatment, hot topics (eyes and VEXAS)

7 Sjögren's Disease

Patient experience, SjD in pregnancy and in childhood; hot topics (GI and oral manifestations, lymphoma and amyloidosis), kidney involvement

8 Systemic Lupus Erythematosus

Patient experience, immune thrombocytopenia, childhood and late onset lupus, lung and heart involvement, LN management, neuropsychiatric manifestations

9 Systemic Sclerosis

Patient experience, hot topics (oral hygiene, soft tissue damage, nutrition, calcinosis, ILD), exercise, ILD treatment

10 Undifferentiated Connective Tissue Diseases

Patient experience, pathophysiology, epidemiology, clinical aspects and red flags, diagnosis, treatment, hot topics (pregnancy, vaccination)
